

MODULE 02

Azure DevOps Work Tracking

Day 1 · Optional MVP Module

ADOBE STOCK PLACEHOLDER

Suggested search: "kanban board with sticky notes (wide hero banner)"

LEARNING OBJECTIVES

- Model modernization work in an Agile hierarchy.
- Configure board, backlog, and sprint views.
- Connect work items to commits and pull requests.

ADOBE STOCK PLACEHOLDER

Suggested search: "agile sprint planning meeting (supporting image)"

WHY THIS MODULE MATTERS

This module is useful for enterprise workflow alignment.

It is optional for MVP delivery where tenant or project provisioning is not guaranteed.

CONCEPT MAP

The Agile process template's work item hierarchy, per Azure Boards documentation — each level rolls up into the one above it.

FROM THE DOCS: HOW WORK ITEMS REALLY LINK

- Agile hierarchy, top to bottom: Epic > Feature > User Story > Task, joined by parent-child links.
- Epics and Features are portfolio-level — they group work, they aren't used to track daily tasks.
- A Bug can be configured to live at the User Story level or the Task level, per team.
- Every work item's Development pane shows linked branches, commits, pull requests, and builds.
- Boards show Kanban-style status; Backlogs prioritize work; Sprints time-box it into iterations.

Suggested search: "team standup meeting in office (detail image)"

COURSEWARE FOCUS

- ADO concepts
- Work item hierarchy
- Sprint flow

TOOLS & RESOURCES

Lab Provisioning

Azure DevOps Demo Generator (azuredevopsdemogenerator.azurewebsites.net)

Auto-populates ADO with pre-configured Epics, User Stories, and Sprints.

Template

Parts Unlimited or eShopOnWeb Demo Project Template

Board configuration, backlog management, and sprint backlog tracking lab.

Documentation

Azure Boards Documentation: Agile Planning and Portfolio Management

Reference guide for team velocity tracking and dashboard queries.

SUPPORTING ASSETS

- ADO project template (if available)
- Reference context: [course/repos/eShopOnWeb](#)

LAB 02: ADO WORK TRACKING

ADOBE STOCK PLACEHOLDER

Suggested search: "project management dashboard on screen (lab / hands-on photo)"

LAB STEPS

Goal: Create the modernization board, backlog, and sprint traceability.

Tools: browser · Requires an Azure DevOps org/project and assigned team members.

- Step 1 — Create epics and features aligned to modernization goals.
- Step 2 — Add user stories, tasks, and bugs.
- Step 3 — Plan one sprint with capacity.
- Step 4 — Create dashboard queries and status widgets.
- Step 5 — Link work items to commits or pull requests.
- Validation: the board hierarchy is complete, and queries/dashboards render live data.

KNOWLEDGE CHECK: Azure DevOps Work Tracking

In Azure Boards' Agile work item hierarchy, which item type groups related user stories into a larger initiative?

- A. Sprint
- B. Epic
- C. Pull Request
- D. Backlog

KNOWLEDGE CHECK: Azure DevOps Work Tracking

In Azure Boards' Agile work item hierarchy, which item type groups related user stories into a larger initiative?

- A. Sprint
- B. Epic**
- C. Pull Request
- D. Backlog

KNOWLEDGE CHECK: Azure DevOps Work Tracking

Per Microsoft's own Azure Boards documentation, what does a work item's Development pane show?

- A. Only its due date
- B. Linked branches, commits, pull requests, and builds
- C. A team velocity chart
- D. A sprint burndown chart
